

MINHAJ ISLAMIC MODEL SCHOOL HAZRO
FIRST TERM EXAMINATION (2026)

Class: 9th Subject: Chemistry Total Marks: 50

Roll No: _____ Student Name: _____ Time Allowed: 1.5 Hours

SECTION A: OBJECTIVE TYPE (10 Marks)

Q1. Choose the correct option for each question:

(i) There are total ----- groups and ---- periods in the modern periodic table:

[A] Seven, eight [B] Eighteen, seven [C] Eight, seventeen [D] Sixteen, eight

(ii) Along the period, which one of the following decreases:

[A] atomic radius [B] ionization energy [C] electron affinity [D] electronegativity

(iii) Transition elements are:

[A] all gases [B] all metals [C] all non-metals [D] all metalloids

(iv) Atoms react with each other because:

[A] they are attracted to each other [B] they are short of electrons [C] they want to attain stability [D] they want to disperse

(v) An atom having six electrons in its valence shell will achieve noble gas electronic configuration by:

[A] gaining one electron [B] losing all electrons [C] gaining two electrons [D] losing two electrons

(vi) Considering the electronic configuration of atoms, which atom with the given atomic number will be most stable?

[A] 6 [B] 8 [C] 10 [D] 12

(vii) Which of the following is a greenhouse gas?

[A] N₂ [B] O₂ [C] CO₂ [D] Ar

(viii) Ozone is beneficial for living organisms because it absorbs:

[A] Infrared radiations [B] Ultraviolet (UV) radiations [C] Radio waves [D] X-rays

(ix) Acid rain has a pH of approximately:

[A] 7.0 [B] 4.2-5.0 [C] 8.0 [D] 2.5

(x) Octet rule is:

[A] description of eight electrons in the innermost shell [B] attaining eight electrons in the valence shell [C] presence of eight electrons in any shell [D] sharing of eight electrons

SECTION B: SHORT ANSWER QUESTIONS (10× 3 = 30Marks)

Q2. Compare the reaction of Alkali metals with chlorine.

Q3. Name any three elements in periodic table which exist as liquids.

Q4. Write down the properties of halogen group?

Q5. Give the trend of ionization energy in periodic table with example.

Q6. Define Atomic radius with example.

Q7. What does Halogen mean? Write 3 halogen elements

Q8. How does Halogen react with 1st group elements? Show with a chemical reaction

Q9. What are some major air pollutants? Define with examples

Q10. What are the sources of Greenhouse gas?

Q11. Give the composition Atmosphere

SECTION C: DESCRIPTIVE / LONG QUESTIONS (2 × 5= 10 Marks)

Q12. (a) What are the effects of Greenhouse gas?

(b) Name sources of Air Pollutant

Q13. What is the trend of the following in the periodic Table?

(a) Electronegativity (b) Electron Affinity
