

MINHAJ ISLAMIC MODEL SCHOOL HAZRO
FIRST TERM EXAMINATION (2026)

Class: 10th Subject: Computer Science Total Marks: 50

Roll No: _____ Student Name: _____ Time Allowed: 2 Hours

SECTION A: OBJECTIVE TYPE (10 Marks)

Q1. Choose the correct option for each question:

(i) Which is NOT an example of an operating system?

- [A] Linux [B] Windows [C] Photoshop [D] macOS

(ii) In multi-user environments, the OS ensures:

- [A] Equal access and data privacy [B] All users share the same files [C] Hardware is never used [D] Internet speed is increased

(iii) In Windows, user accounts can be created via:

- [A] Task Manager [B] Control Panel or Settings [C] Disk Management [D] BIOS settings

(iv) The core part of the OS that interacts directly with hardware is the:

- [A] Shell [B] Kernel [C] Device Driver [D] System Library

(v) A graphical shell allows the user to:

- [A] Type commands only [B] Click icons and use menus [C] Interact only via code [D] Access only the BIOS

(vi) In the FCFS scheduling method, processes are served:

- [A] Randomly [B] Shortest job first [C] In the order they arrive [D] By priority only

(vii) Threads in the same process

- [A] Have separate memory spaces [B] Share the same memory and resources [C] Run on different OS [D] Cannot run simultaneously

(viii) When the RAM is full, what does the operating system use to act as temporary RAM?

- [A] The CPU's internal cache [B] A portion of the computer's storage drive (like an HDD or SSD) [C] The motherboard's ROM [D] Cloud storage via the internet

(ix) In an operating system, running programs are referred to as:

- [A] Resources [B] Processes [C] Threads [D] Background tasks

(x) What type of software is an Operating System?

- [A] Application software [B] System software [C] Utility program [D] Network software

SECTION B: SHORT ANSWER QUESTIONS (10 × 3 = 30 Marks)

Attempt TEN (10) questions from this section. Each question carries 3 marks.

Q2. Why is the operating system referred to as the "central controller"?

- Q3. How does the OS act as a translator between the user and hardware?
- Q4. Define one way to create a new user account in Windows.
- Q5. How is kernel different from shell.
- Q6. Give one example of a system library and its purpose.
- Q7. Explain one advantage and one disadvantage of FCFS scheduling.
- Q8. Why is virtual memory slower than RAM?
- Q9. Define a system call.
- Q10. What is the role of a file system?
- Q11. Define multitasking in computer system.

SECTION C: DESCRIPTIVE / LONG QUESTIONS (2 × 5 = 10 Marks)

Attempt TWO (2) questions. Each question carries 5 marks.

- Q12. Describe the architecture of an operating system, explaining kernel, shell, and layered design with examples.
- Q13. Explain the process lifecycle in detail with examples.

GOOD LUCK😊.
